About

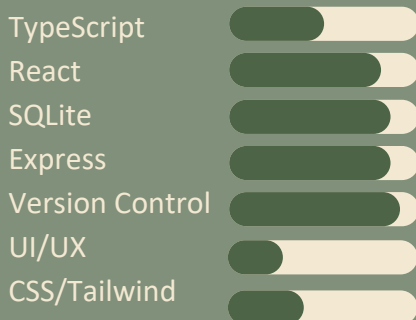

A fellow dev once told me, "Being a dev gives you the tools to bring your ideas to life." As a creative and avid learner, I became enamoured. Hence, I am transitioning to the tech world, bringing rich experience from my background in retail and hospitality operations management.

Experience

Human Skills ▼

Tech Skills

Multi-Site Manager

Lagardere March 2020 - October 2023

Summary:

As a multi-site manager in the travel retail industry, I bring a unique perspective and valuable skills to a Full-Stack Developer role. My experience in managing operations, staff, and budgets across multiple locations has equipped me with a strong foundation in problem-solving, strategic planning, and technology-driven efficiency improvements.

Achievements:

- Navigated and maintained profit across four sites through Covid-19, the greatest impact on the travel retail industry.

Restaurant Manager

McDonalds Jan 2019 - Dec 2019

Summary:

As a Restaurant Manager I was responsible for overseeing the daily operations of a high-volume restaurant. I ensures that the restaurant operates efficiently and profitably while maintaining the company's standards for quality, service, and cleanliness. My leadership drove the team to deliver an exceptional customer experience.

Achievements:

- Awarded AAA bsv score, a yearly audit to measure the Restaurant on key metrics.
- Completed a week long first response IT course to minimise downtime due to technology.

Education

Dev Academy

2024

Applied Software Development (level 6)

Summary:

Dev academy strived to simulate a working environment for developers. Weekly, Dev academy would assign small teams where we had to develop Full stack web applications. In those small teams we would need to self assign agile roles such as, product owner, git keeper and scrum master, a role I was particularly fond of due to my experience.
